Application No.: 10/779,773

Docket No.: 1315-055

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously presented) A head lamp assembling device of a front end module for a vehicle, which locate the device being arranged for locating head lamps on a carrier in exact positions, comprising:

a carrier assembling stand for fixing the carrier;

a position adjusting means adjuster for adjusting a position of the head lamp, the position adjuster including a fender dummy of a shape corresponding to a fender part of the vehicle on which the head lamp is to be mounted; and

movable means an actuator for moving the position adjusting means of the head lamp adjuster.

2. (Cancelled)

3. (Previously presented) The head lamp assembling device according to claim 1, wherein the carrier assembling stand includes a vertical frame and a horizontal frame, the vertical frame having a horizontal fixing jig for fixing and supporting the carrier in the horizontal direction, the horizontal frame having a vertical fixing jig for fixing and supporting the carrier in the vertical direction.

Application No.: 10/779,773

Docket No.: 1315-055

- 4. (Original) The head lamp assembling device according to claim 3, wherein the horizontal fixing jig includes:
- a horizontal position adjusting pin to be inserted into a horizontal position adjusting hole formed in the carrier for fixing the horizontal position of the carrier; and
 - a drive unit for moving the horizontal position adjusting pin.
- 5. (Original) The head lamp assembling device according to claim 3, wherein the vertical fixing jig includes:
- a vertical position adjusting pin to be inserted into a vertical position adjusting hole formed in the carrier for fixing the vertical position of the carrier; and
 - a drive unit for moving the vertical position adjusting pin.
- 6. (Currently amended) The head lamp assembling device according to claim 1, wherein the carrier assembling stand has at least one or more measuring sensors for checking whether or not the head lamp is correctly positioned in the exact position.
